Full-Stack Web Developer

I'm an eager, creative, hard-working critical thinker that enjoys clean code and creating smooth user experiences. I'm able to adapt to new technologies quickly; independent learning is sort of a vice of mine.

Technical Capabilities

Languages: HTML, CSS, JavaScript (incl. jQuery, Angular, Node), PHP, SQL, Java, C#
Tools: Git, Bootstrap, Sass/SCSS, Less, Bower
Stacks: LAMP, MEAN

Education

Southeast Technical Institute – Sioux Falls, SD
AAS, Computer Programming, degree expected July, 2016
GPA: 3.25

Courses:

Intro to Programming	Dynamic Web Development
Internet Programming Essentials	Advanced OOP
C# Programming	Advanced Databases
Intro to Java	Advanced Technologies
Intro to Databases	Network and OS Fundamentals
Image and Animation Applications	Advanced Application Development
eBusiness	Web Services
Intro to Microsoft Web Development	Advanced Microsoft Web Dev.

Web Development Experience

Personal Portfolio   **http://jamadoor.com/**

A single-page application written in Angular, styled using Bootstrap, then customized using Sass.

SN!   **http://sn.jamadoor.com/**

This was a project for my Advanced Application Development course. It's a full-fledged twitter-esque social network. It has jQuery, AJAX functions and photo uploads. Built using PHP and MySQL as the backend.

Chatr   **http://chatr.jamadoor.com/**

Chatr is a disposable chat application created using Node, Express, and Socket.io on the backend and jQuery, Bootstrap, and SCSS on the frontend. Chatrooms are created dynamically based on the URL.

Work Experience

Network Security Technician – SDN Communications – July 2015 – Present
- Diagnose and troubleshoot internet connections for customers.
- Critically think out solutions for customers or partner companies.
